

How you can help at home?

You can support your child to access online learning resources. This might be helping them to logon regularly or sitting down with them to ensure they are getting the most benefit from the activities and tasks they are completing.

Your child's Google account and online resources can be accessed in any web browser. This includes on tablets and gaming consoles that are able to access the internet. The city's libraries also offer free access to the web via computer and wireless connections.

Ensure that you know where to find your child's login details. This should be on the back of their reading record.

Online apps you child can access include;

Bug Club

EducationCity

SCRATCH

code club

Teach your monster

TAKE 100%

Clicker Apps
iPad / Chromebook

G Suite For Education

Monitor and supervise your child's device usage.

Computing and E-Safety

Computing Curriculum

At St George's when teaching computing we:

- *encourage hands on participation.
- *taking a growth mindset approach.
- *helping each other to succeed .

We use Teach Computing Curriculum from The National Centre for Computing Education to structure our computing curriculum.

In EYFS children develop basic skills and learn to use devices to support their learning and play. They are also encouraged to develop computational thinking skills through cross curricular and sequencing activities. This is supported using the Barefoot Computing materials.

In KS1 and KS2 children take part in lessons to develop their understanding of the key elements on the National Curriculum in the following areas units;

Computing Systems and networks	Creating Media Unit 1	Creating Media Unit 2
Information and Data	Programming A Computational thinking / concept	Programming B Application

This is in addition to pupils being able to develop and apply their digital skills through the use of ICT across the curriculum.

Technology

The children use Chromebooks in the classroom to support their learning. Children are given a Google Education login when they join us that enables them to access work and learning resources both in school and at home.

E-Safety

Our pupils use the internet on a regular basis as part of their learning. In school, we have regular e-safety activities and focused lessons to not only educate pupils on the importance of keeping themselves safe online but what to do if they find themselves in a situation that makes them feel uncomfortable. We must work together to ensure our children are safe and ensure they always behaviour appropriately.

The internet is a wonderful tool and is widely available with the increased use of smart phones and tablets. At

Smartie the Penguin

If anything happens online that makes **Smartie the Penguin** feel worried, upset or confused, he doesn't try to fix things by himself ...

Mummy! Daddy! Please help me ...

Hi!

Always ask an adult for help!

- He stops ...
- Thinks about what to do ...
- And always asks an adult for help!

Childnet International UK Safer Internet Centre Co-financed by the European Union Connecting Europe Facility

www.childnet.com/smartie

home, it is becoming increasingly difficult to supervise children whilst they are using the internet, therefore it is important that the appropriate parental controls are set through your internet service provider (ISP).

Each year the whole school also takes part in National Online Safety Day which usually takes place in February each year.

For more information or advice about E-Safety ask at the school office.

BE SMART ONLINE

S SAFE Keep your personal information safe. When chatting or posting online don't give away things like your full name, password or home address. Remember personal information can be seen in images and videos you share too. Keep these safe to keep yourself safe.

M MEET Meeting up with someone you only know online, even a friend of a friend, can be dangerous as this person is not a stranger. If someone you only know online ever asks you to meet up, for personal information or for photos/videos of you then tell an adult straight away and report them together on www.childnet.org.uk.

A ACCEPTING Think carefully before you click on or open something online (e.g. links, adverts, friend requests, photos) as you never know where they may lead to or they may contain viruses. Do not accept something if you are unsure of who the person is or what they've sent you.

R RELIABLE You cannot trust everything you see online as some things can be out of date, inaccurate or not entirely true. To find reliable information compare at least three different websites, check in books and talk to someone about what you have found.

T TELL Tell a trusted adult if something or someone ever makes you feel upset, worried or confused. This could be if you or someone you know is being bullied online. There are lots of people who will be able to help you like your teachers, parents, carers or contact Childline - 0800 11 11 or www.childline.org.uk

BE SMART WITH A HEART

Remember to always be smart with a heart by being kind and respectful to others online. Make the internet a better place by helping your friends if they are worried or upset by anything that happens online.
